

# Chemical and Industrial Services

**A nimble and responsive team protecting and serving chemical and industrial services market leaders.**

Members of McGlinchey's Chemical and Industrial Services team have a wide range of technical expertise, giving us the ability to address the diverse needs of companies in these industries. Many of our attorneys have education or training in chemical and mechanical engineering, physics, and biology. We follow scientific developments and litigation trends closely and respond proactively to best prepare our clients for challenges. We advise on a full range of issues facing companies in this sector, including:

- Asbestos, legacy, and ground contamination litigation
- Bankruptcies, workouts, acquisitions of distressed companies
- Buying, selling, and financing equipment
- Construction
- Environmental litigation, regulation, transactions
- Global patent prosecution
- Insurance
- Labor and employment
- Maritime
- Mergers and acquisitions

- Real estate
- Wetlands and coastal zones
- Wrongful death litigation
