

# Environmental Permitting

July 25, 2012

Assisted clients in all matters of air, water, solid and hazardous waste, and wetland permitting issues, including, for example, assisting numerous clients in wetland permitting issues under the federal Clean Water Act (Section 404 Permits) and the Louisiana Coastal Resources Program (Coastal Use Permits); developers and operators of solid waste disposal facilities in both permitting and compliance issues; federal and state environmental permitting aspects of a pipeline construction project; marine services provider in seeking a refuse incinerator exemption and stormwater permit at a major shipyard; liquid waste disposal company on federal permitting of controversial oilfield waste disposal facility; commercial exploration and production waste underground injection well.
